UpToDate® Delivers Powerful Features

UpToDate is one of the most widely used clinical information resources in the world. It provides unbiased, continuously updated, evidence-based information, an intuitive user interface, and powerful features that enable clinicians to make diagnoses, create treatment plans and share information quickly and efficiently.

- Learn "What's New" by specialty since the last release.
- View a detailed outline within each topic.
- Click on a heading to go directly to the information you need.
- Review treatment recommendations.
- Link to graphics and tables relevant to the topic.
- Use the Find tool to search for a word or synonym within a topic.
- Access patient information to share with your patients.
- Print text, references, graphics or the entire topic.
- Submit questions and comments to our editors.
- Email topics to your colleagues.
- View the date when the topic was last updated.
- Link to information about authors and editors.
- Access related topics to find additional information.
- Click to view a Medline abstract.
- Provide valuable feedback.

- Pulmonary, Critical Care and Sleep Medicine
- Rheumatology

Specialties in development:
- Dermatology
- Psychiatry
- Surgery

Comprehensive Features

UpToDate is committed to innovation and value, so we are continually making enhancements that will help clinicians provide better patient care. Here are just a few of the features we’ve added since 1992:

- **Optimized search capabilities** allow you to search with multiple terms to find quick answers to your clinical questions in over 8,300 topics.

- **Over 6,800 graded treatment recommendations.**

- **Medline abstracts** provide access to over 385,000 references with links to full text articles.

- **Text, graphics and abstracts** are included in UpToDate’s 97,000+ pages.

- **Drug database and drug interactions database** (in partnership with Lexi-Comp®) include over 4,600 adult, pediatric, international and natural drugs and allow clinicians to check for potentially dangerous drug-to-drug, drug-to-herb, and herb-to-herb interactions.

- **Calculators** provide access to 97 medical calculators, eliminating the need to remember formulas or use separate devices.

- **“What’s New,”** which includes Practice Changing UpDates, provides a summary of important new findings by specialty.

- **Patient information** includes over 600 topics written specifically for patients.

- **Email tool** allows you to send topics to your colleagues or patients.

- **Feedback button** allows you to submit questions and comments to our editors.

COMPLIMENTARY TRIAL

Evaluate UpToDate for your institution with our complimentary trial, which provides users with direct access.
